## **Worth Reading**

---

Truckloads will be delivered by us on the 10 to 49 prices and on the 1 to 9 prices according to the bulkiness of plants purchased.

Carloads can be shipped on a special low B&B rate of 18,000 pounds minimum within Texas and may be stopped en route in the same general vicinity for partly unloading at a charge of \$6.30 for each stop. Thus you may combine with other nearby nurserymen for less than carload quantities at the carload prices and cheap freight rates.

Approximate weight of balled plants are:

Under 18 inches-----	12 to 20 lbs.
18 to 24 inches-----	30 to 40 lbs.
2 to 3 and 3 to 4 feet-----	40 to 60 lbs.
5 to 6 feet-----	60 to 100 lbs.
Larger plants-----	up to 800 lbs.

Scottdale is in Harrison County, Northeast Texas, where nursery stock, along with natural plant life, becomes dormant in October, goes through normal winter temperatures of 20 degrees above zero and does not break into spring growth until late February or early March, thus producing hard, fully dormant nursery stock which ships safely anywhere.

Our evergreens are grown on moderately rich, firm, but porous soil which permits the ball of earth to readily unite with the soil into which it may be planted. All of the balls are flat bottomed and uniform in dimensions according to the size of the plant. These are valuable factors.
